

AUTHORIZED ASSESSOR

Being an IEEE Authorized Assessor enables you to generate continuous expertise, gain credibility, and expand your professional and technical portfolio. As an IEEE CertifAIEd partner, you will be part of an IEEE global ecosystem that will allow you to generate new opportunities, with the potential to drive towards new standardization paths to help maintain long-term value.

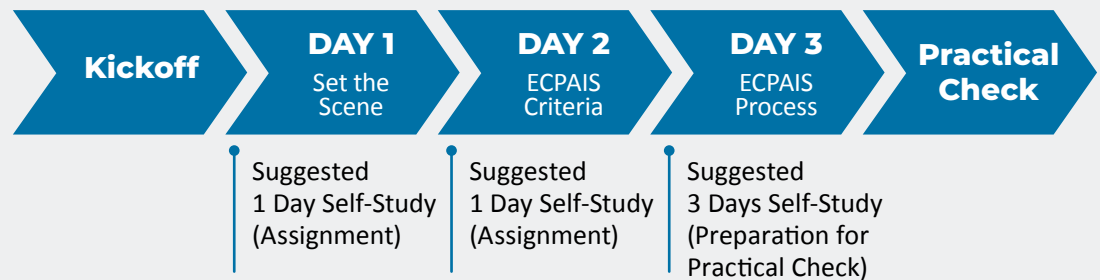

Individuals who are interested in becoming IEEE Authorized Assessors undergo in-depth [Master Class training](#) in the CertifAIEd criteria and process, beginning with key principles of ethical AI to the fundamentals of the CertifAIEd assessment methodology and certification. Trainees learn about the importance of having a mark that distinguishes AI products, services, and systems that meet ethical criteria. Upon successful completion of an exam, individuals are eligible to be qualified as an IEEE Authorized Assessor.

IEEE Authorized Assessors are qualified to guide organizations towards responsible innovation by:

- Providing consulting services to help meet ethical compliance goals based on IEEE CertifAIEd criteria (independent of an IEEE CertifAIEd assessment)
- Helping to develop contextualized CertifAIEd criteria applicable to a specific industry or context of application
- Conducting a formal assessment against IEEE CertifAIEd criteria.

IEEE CertifAIEd Master Class for Assessors

The IEEE CertifAIEd Master Class for Assessors is comprised of online training; interactive learning; and self-study assessments on real life cases:

Duration: Total of 3 days plus Kickoff, Practical Check, and Self-Study times
