

XR IN THE CLASSROOM

14 October 2021 | 11:30 AM ET | 17:30 CET

FRIDOLIN WILD

Fridolin is a professor at the Institute of Educational Technology of The Open University, also leading the Performance Augmentation Lab (PAL). Fridolin seeks to close the dissociative gap between abstract knowledge and its practical application, researching radically new forms of linking directly from knowing something 'in principle' to applying that knowledge 'in practice' and speeding its refinement and integration into polished performance.
